

MSc in IT, Digitalization & Sustainability

How can information technologies contribute to global sustainable development in the context of digital transformation?

Lucerne University of Applied Sciences and Arts
School of Computer Science & Information Technology

Peter H. Wullschleger
Head of Master's Degree Program IT, Digitalization & Sustainability

Some remarks at the beginning

- If you don't hear me, please contact me now using the Chat.
- This presentation takes about 15 - 20 minutes, after which there are about 10 minutes available for questions.
- Of course, questions can also be asked during the presentation.
- For questions you can use your microphone or the chat.
- If not, everything goes smoothly at the online info event, we ask for your understanding.
- After the information event you will receive the presentation by e-mail.
- We are grateful for your feedback, which should help us to improve our information events.

Philosophy of education

High level of flexibility:

Up to 50% of the courses can be chosen by the students themselves.

Breaking new ground:

We develop study programs that are innovative, future-oriented, interdisciplinary and offer our graduates excellent career prospects.

Computer science is global:

We encourage our students from all degree programs to spend part of their studies abroad. This opens them up to new horizons and perspectives.

About the program

Framework conditions

Master of Science in IT, Digitalization & Sustainability

- is based on international cooperation
- leads to two Master's degrees (one from HSLU, one from the international partner university)
- 120 ECTS Credits
- 4 Semesters
- Taught in English
- Mandatory Semester(s) abroad
- Target Group: National and International Students

Field of activity

Graduates will be equipped for the future professional requirements of a digitalized and sustainability-oriented professional world. Possible fields of work in «digitalization» and «sustainability»

Managing complex sustainable IT projects in an international and intercultural environment

Leading projects related to sustainable digital transformation and related business models

Implementation of projects in connection with sustainable business models

Consulting/project management in the field of international value chains, digitalization and sustainability

Leading and managing IT companies

Management positions in international corporations in a wide variety of industries

The basic, original idea behind the MSc IT, Digitalization & Sustainability

disruptive technologies

digital transformation

sustainable development

- global issues that continue to confront us with major challenges today and in the future
- the need for international cooperation

Intercultural Competences, Management, Leadership & Project Management

Sustainability

7 digital transformation trends

1. Accelerated digital transformation
2. Elevated CIO roles
3. Increased focus on UX and CX
4. Agile workflows
5. Visual collaboration
6. Rise in small business entrepreneurship
7. Ongoing evaluation of tech stacks

Digitalization, Digital Transformation

Globalisation

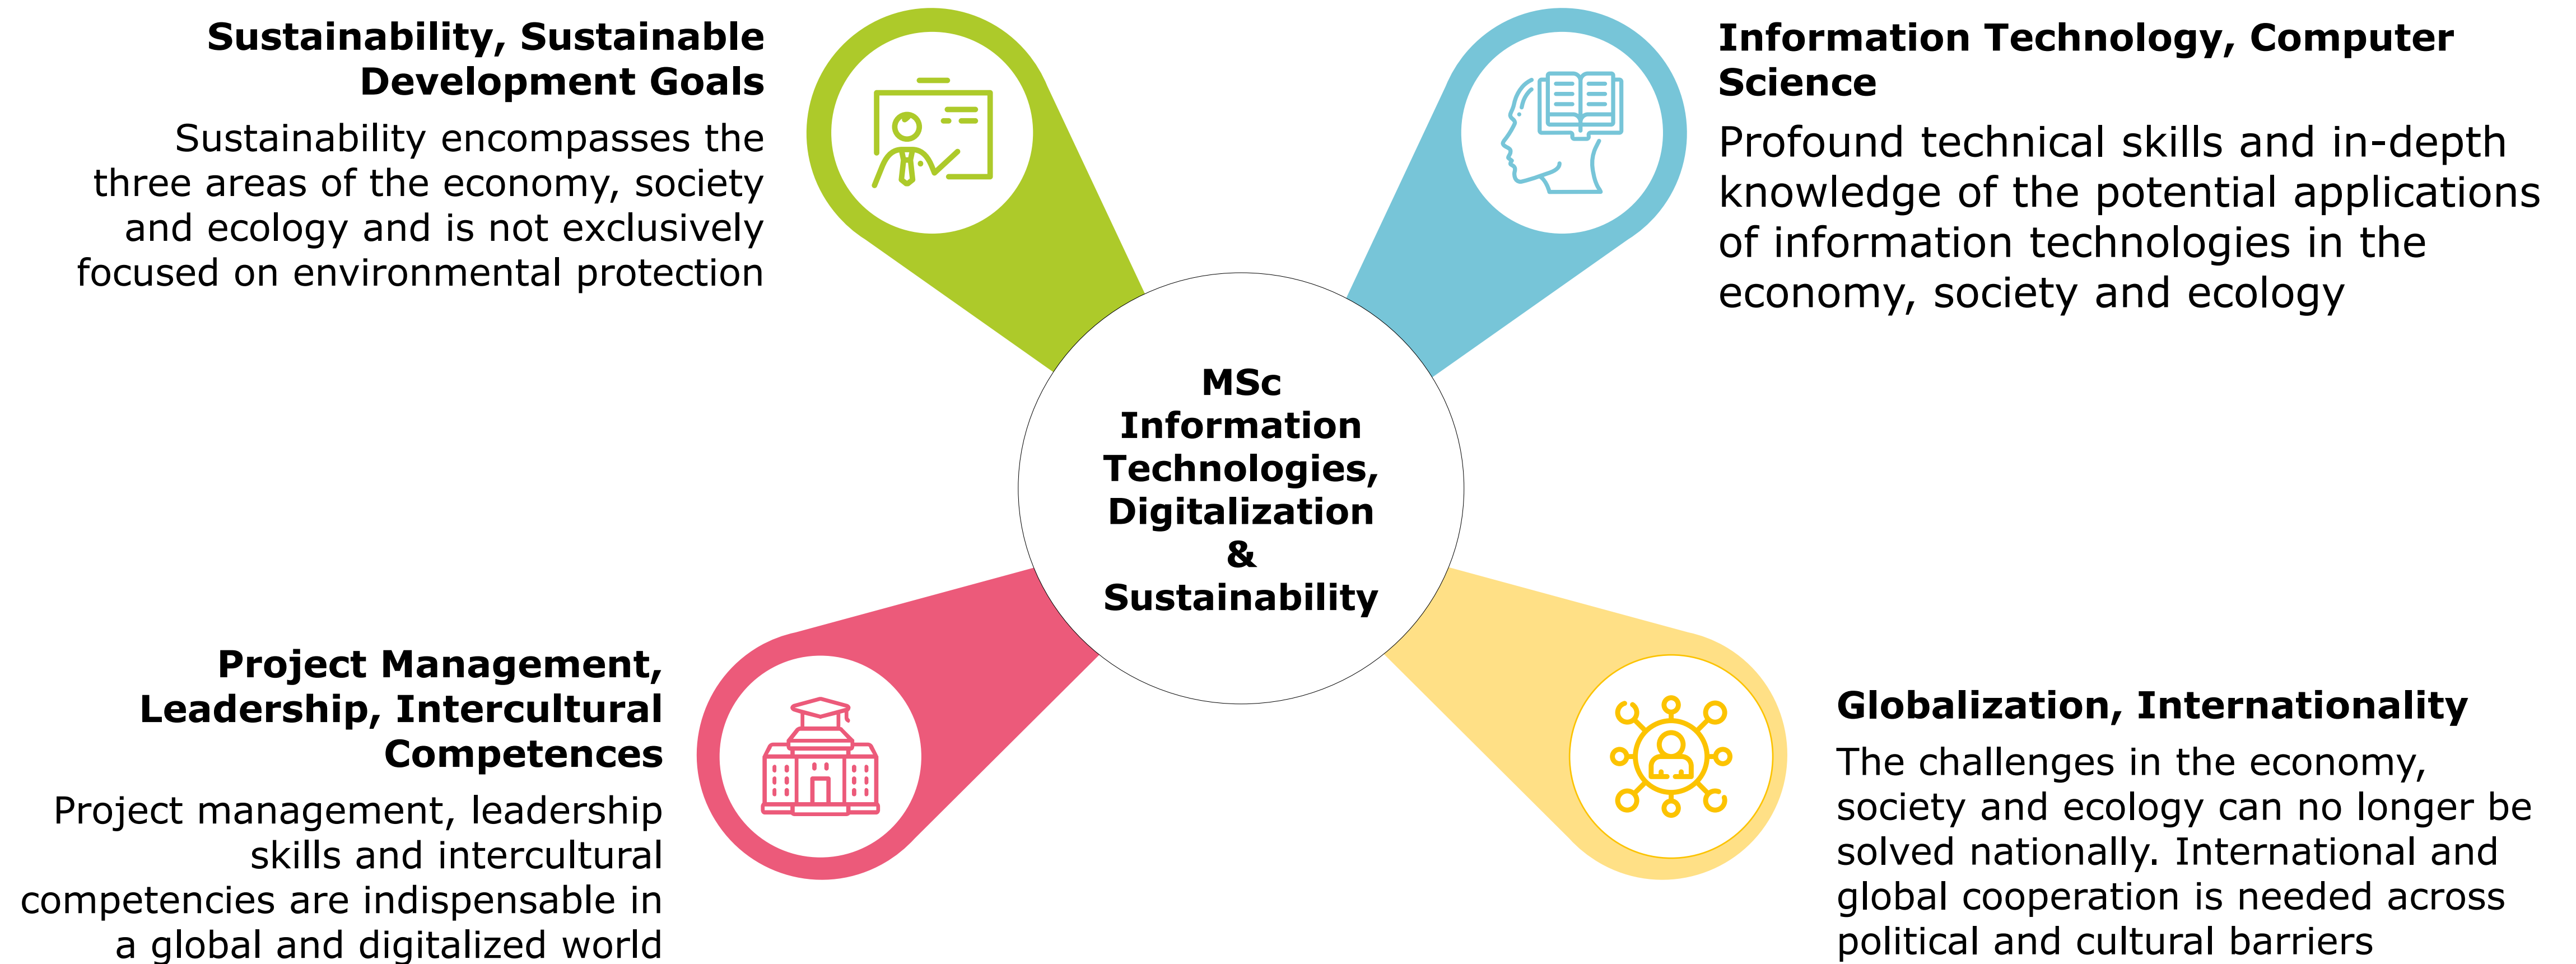

Information Technology
Computer Science

Sustainability as a cross-sector topic
