What future do we want?

Generative AI: Crafting Our Future, One Algorithm at a Time

Dr. Ehi Nosakhare is a Machine Learning Scientist and currently works as a Senior Applied Science Manager at Microsoft. She is deeply passionate about using Artificial Intelligence (AI) to solve real-world problems in a responsible way. Her talk will offer an overview of the current state and future potential of Generative AI and emphasize the importance of ethics, safety, and security. We invite you to join us in exploring the intricate landscape of Generative AI and envision a world where technology serves as a catalyst for positive change.

24. März, 11:30 (*Lunch Talk with Sandwiches*)
